

*Screening can find precancerous polyps—abnormal growths in the colon or rectum—so they can be removed before turning into cancer.

WE HAVE A SCREENING FOR THIS!

*Talk to your provider about when you should be screened.

Colorectal Cancer

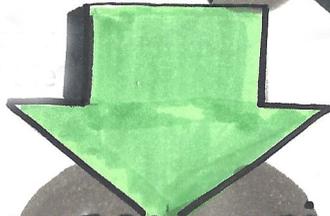

WHAT IS COLORECTAL CANCER?

IT SAVES LIVES!

★ IF YOU ARE 50 YEARS OR OLDER YOU SHOULD GET SCREENED!

*One in five people with colorectal cancer have been diagnosed with depression
